

The Cashmaster and DTS Connex® partnership creates a fully integrated cash management solution

The new innovative technology will integrate Cashmaster's count-by-weight technology and DTS Connex, creating complete enterprise wide visibility of the cash handling process. This new solution will show the cash position from POS, to the back office, in transit to the bank, and when it is credited to the customer's account.

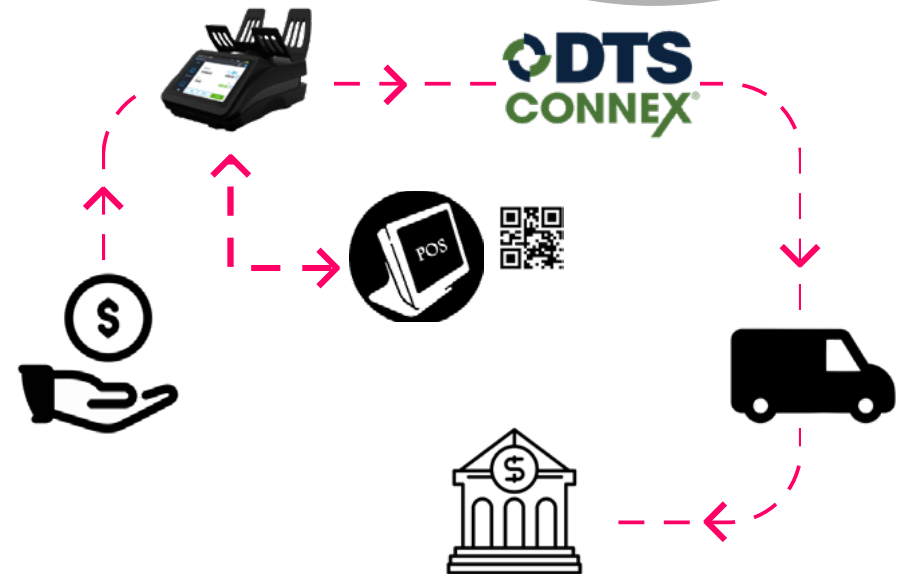

Benefits for your business

- Full visibility of your cash flow across the business
- Increased accuracy and efficiency
- An end-to-end solution for your employees

We are excited to launch our new partnership with DTS Connex as it will offer customers an efficient end-to-end solution and the visibility of the entire cash management process.
 - Gordon McKie, CEO of Cashmaster International

*'We're looking forward to implementing our joint solution to many businesses across the USA to help them drive down operational costs and improve efficiencies'.
 - Lou Salafia, President of DTS Connex*

1. Quickly and accurately count your stores' cash drawers with our Cashmaster One count-by-weight devices.
2. Automate input count data into your POS using Cashmaster QR Link.
3. Count and prepare your cash deposit on Cashmaster One. Transfer the data automatically to the DTS Connex systems.
4. Your cash deposit is transferred by CIT.
5. Your deposit is received and validated by the bank. Transaction detail, including the most recent status updates, are available through the DTS Connex system in real-time.
6. Change orders, scheduled through the DTS Connex system and transferred back to your store.
